KS-2
Protection Sleeve

Application . . .

Silicone Grommet/Protection Sleeve to protect heating cable from damage by sharp edges such as end plates of insulation cladding. The sleeve is supplied in 1 meter lengths and can be easily cut to size. The sleeve can be exposed to a maximum temperature of 250°C.

KS-2 protection sleeve is designed to protect the heater cable from potential mechanical damage such as sharp edges of metal cladding. Typical examples are where heater cable exits metal cladding at flanges or from pipe’s and vessel’s. The “C” shape profile allows the protective sleeve to be retrofitted to existing installations as well as being used on new work. KS-2 is cut to length with a knife or side cutters.

Physical Properties . . .

Tensile Mpa ..................................... 9.2 N/mm²
Tear Strength .................................... 21 N/mm
Elongation ............................................... 260%
Oxygen Index ............................................ 39%
Maximum working temperature .............. 250°C

Specifications . . .

- Low Smoke
- Zero Halogen
- Silicone Rubber
